ABSTRACT

This report, the 31st in a series, presents public school statistics for the 50 States, the District of Columbia, and the regions and outlying areas of the United States. It include estimates of the administrative organization, pupils, high school graduates, professional staff and salaries, and revenues and expenditures. The text presents national data for each of the past 10 years and defines the basic series of statistics. Tables present the revised estimates by State and region for 1971-72 and the preliminary estimates for 1972-73. A related document is ED 060 528. (Author)

FOREWORD

THIS 31st ANNUAL REPORT—*Estimates of School Statistics, 1972-73*—presents public-school statistics for the 50 states, the District of Columbia, the regions, and the outlying areas. The text presents national data for each of the past 10 years and defines the basic series of statistics. The tables present the revised estimates by state and region for 1971-72 and the preliminary estimates for 1972-73.

With few exceptions, as noted, the estimates are consistent in definition with the accounting procedures recommended by the U.S. Office of Education. All figures for this year and last year are *estimates* and should not be used after the final reports of state and national data become available from official government sources.

In addition to the usual hazards of estimates which are made before all of the state legislatures have adjourned and all of the local school systems have reported to the states, this year's estimates presented some special problems:

- The estimates of revenue from the federal government are extremely tenuous because the fiscal 1973 appropriation for the U.S. Department of Health, Education, and Welfare, which includes the education grants in aid, was vetoed. The federal programs are operating on a continuing resolution at about the same level as last year until the new 93rd Congress passes an appropriation act which the President will sign.

- A part of the increase in federal revenues reflects an improvement in the ability of the states to account for the monetary value of surplus commodities distributed by the federal government for use in the school lunch programs. Another part of the increase is attributed to the new federal funds provided the state governments through the revenue-sharing act passed late in the 92nd Congress and in which local school systems in some states are expecting to share.

- Figures for school-age population (5-17 years) by state are not available from the U.S. Bureau of the Census for the years since 1970. The state population figures shown in Table 2 are NEA estimates.

- Some of the change observed from year to year in part reflects improvement in the states' ability to collect and process data. Some states can collect and report actual data, rather than estimates, especially statistics of pupils and teachers.

This project is a cooperative one involving NEA Research, state departments of education, and state education associations. Preliminary estimates of NEA Research are submitted to the state departments of education and to the state education associations for verification or revision. State figures not verified or revised are marked as NEA Research estimates.

This report was prepared under the direction of Jean M. Flanigan with the assistance of Arthuryne J. Taylor, Peter D. Veillette, Richard E. Scott, and Nancy T. Chow.

NEA Research expresses deep appreciation to the public officials and education association leaders whose cooperation made this report possible.

GENERAL ADMINISTRATION

Each state has a state department of education which is headed by a chief state school officer and which exercises general control over public elementary and secondary schools. Many states, particularly those with large numbers of small school districts, have intermediate administrative units operating between the state and the local levels. These intermediate units render consultative, advisory, and statistical services, and perform regulatory and inspectional functions. Some operate specialized schools for vocational education, special education, and the like. The local school district is the basic administrative unit for the operation of elementary and secondary schools or for contracting for school services. The governing body of the district is the school board. The chief administrative officer is the superintendent of schools.

Basic Administrative Units

In organization, size, and characteristics, local school districts vary greatly throughout the United States. They may be independent governmental units or agencies of a state, county, or local government. All school districts providing education through grade 12 are independent governmental units in 30 states; in four states and the District of Columbia all districts are dependent. In the remaining states there are school districts of both types.[1]

A school district may operate a school system for all or for some of its children or may pay other school districts for these services. In complexity of operation, these basic local units range from one-teacher rural systems to large metropolitan systems serving many thousands.

The number of basic administrative units reported in 1931-32 was 127,422. Primarily as a result of reorganization laws, which have facilitated the consolidation and annexation of school districts, the number of such units has declined steadily. The 1972-73 total of 17,036 represents an 86.6 percent decrease from the 1931-32 figure, a 48.1 percent decrease in the 10-year period since 1962-63, and a 1.4 percent decrease in the past year.

The trend over the past 10 years in the total number of basic administrative units in the states and the District of Columbia is shown below by combining figures of the U. S. Office of Education with NEA Research estimates (NEA Research estimates are starred):

School year	Basic administrative units
1962-63	32,820*
1963-64	31,705
1964-65	28,777*
1965-66	26,983

Of the 17,036 basic administrative units estimated for 1972-73, 16,653, or 99.5 percent, are operating school districts, and 383 do not operate any school facility, but transfer their pupils elsewhere. The comparison below by regional distribution of operating school districts and pupil enrollments in the fall of 1972 gives some indication of the variation in size of school district.

PUPILS

School-age population (5 to 17 years), enrollments, average daily membership, and average daily attendance are basic to the measurement of the size and cost of the public schools. Estimates of state school-age population and fall enrollments are shown in Table 2 for 1971-72 and 1972-73. The figures for the 50 states and the District of Columbia on cumulative enrollment, average daily membership, and average daily attendance are shown in Table 3 for 1971-72 and in Table 4 for 1972-73.

Population 5-17 Years of Age

The population 5-17 years of age is the age group which is most significant for predicting the elementary- and secondary-school enrollments. According to the Decennial Census the resident school-age population of the United States, including Alaska and Hawaii, increased from 43,881,000 on April 1, 1960, to 52,496,000 on April 1, 1970, an increase of 19.6 percent. The total population of the United States, excluding the Armed Forces overseas, increased from 179,323,000 to 203,235,000 over the same period, an increase of 13.3 percent. The school-age population was 24.5 percent of the total population in 1960, and had increased to 25.8 percent of the total population by 1970. The estimated age group (5-17) was 52,502,000 as of July 1, 1970, and decreased 1.4 percent to an estimated 51,784,000 as of July 1, 1972. The drop in school-age population between 1970 and 1971 broke the upward trend which began at the close of World War II. The estimated school-age population on July 1, 1972, showed a gain of 11.0 percent over July 1, 1962, and accounted for 24.9 percent of the total resident population of 208,232,000. The 10-year trend in school-age population compared with fall enrollment is given in the next section.

Public-School Enrollment: Fall and Cumulative

The figures for resident school-age population (5-17 years) and estimated fall enrollment in public elementary and secondary schools for the past 10 years are shown below (NEA Research estimates are starred; other fall enrollment figures are from USOE):

Year	Total resident school-age population as of July 1	Total fall enrollment	Percent enrollment is of school-age population
1962-63	46,645,000	38,748,907*	83.1
1963-64	48,055,000	41,025,000	85.4
1964-65	49,499,000	41,339,929*	83.5
1965-66	49,914,000	42,835,000	85.8
1966-67	50,681,000	42,968,286*	84.8
1967-68	51,350,000	43,891,000	85.5
1968-69	51,952,000	44,871,742*	86.4
1969-70	52,355,000	45,618,578	87.1
1970-71	52,502,000	45,894,313*	87.4
1971-72	52,287,000	45,887,695*	87.8
1972-73	51,784,000	45,821,743*	88.5

State-by-state estimates of cumulative enrollments for 1971-72 and 1972-73 are shown in columns 2 to 4 of Tables 3 and 4. NEA Research estimates include kindergarten in the elementary-school enrollments, include junior high schools in the secondary-school enrollments, and omit junior-college enrollments. These figures reflect cumulative enrollment by organizational level, elementary and secondary, through the end of each school year. The following figures show enrollments for the years 1962-63 through 1972-73 in the NEA series.

School year	Cumulative public-school enrollments (NEA Series) Elementary	Secondary	Total
1962-63	26,162,345	14,194,666	40,390,049*
1963-64	26,375,458	15,161,428	41,536,886
1964-65	27,127,448	15,740,118	42,867,566
1965-66	27,672,348	15,904,750	43,577,098
1966-67	28,182,153	16,413,668	44,595,821
1967-68	28,643,977	16,895,013	45,538,990
1968-69	28,797,997	17,696,536	46,494,533
1969-70	29,203,080	17,970,156	47,173,236
1970-71	29,502,572	18,360,808	47,863,380
1971-72	28,358,322	19,416,726	47,775,048
1972-73	28,077,567	19,630,061	47,707,628

*Includes 33,038 unclassified enrollees in grades K-12.

A total cumulative enrollment of 47,707,628 is estimated for the school year 1972-73. This is a decrease of 0.1 percent from 1971-72, and an increase of 18.1 percent over 1962-63.

Average Daily Membership

A pupil is a member of a school from the date he is placed on the current roll until he leaves permanently. Membership is the total number of pupils belonging, the sum of those present and those absent. Average daily membership for the school year is an average obtained by dividing the aggregate days of membership by the number of days in which schools were in session.

The U. S. Office of Education in *State Education Records and Reports Series: Handbook II* recommends average daily membership as the best measure of pupil load. However, some states have not adopted this method for reporting pupils.

Column 5 of Tables 3 and 4 gives the estimated ADM for 1971-72 and for 1972-73 for the states reporting and an estimated total for the 50 states and the District of Columbia. In 1971-72 the estimated ADM total was 45,383,262; in 1972-73, 45,237,282. This represents a decrease of 0.3 percent.

The 10-year trend in average daily membership shows an increase of 17.2 percent since 1962-63. The estimated average daily membership since 1962-63 is shown below as a combination of the figures of the U. S. Office of Education and NEA Research (NEA Research estimates are starred):

School year	Average daily membership	Percent increase Over 1962-63	Over previous year
1962-63	38,600,000*	...	...
1963-64	39,700,000	2.8	2.8
1964-65	40,821,680*	5.8	2.8
1965-66	41,500,000	7.5	1.7
1966-67	42,499,817*	10.1	2.4
1967-68	43,269,300	12.1	1.8
1968-69	44,341,836*	14.9	2.5
1969-70	44,719,200	15.9	0.9
1970-71	45,393,630*	17.6	1.5
1971-72	45,383,262*	17.6	-0.0
1972-73	45,237,282*	17.2	-0.3

Average Daily Attendance

The average daily attendance for the school year is the aggregate days the pupils were actually present in school divided by the number of days school was actually in session. From 1971-72 to 1972-73, average daily attendance decreased 135,287 from 42,412,699 to 42,277,382, or 0.3 percent. The figures below show the trend in average daily attendance by combining the figures of the U. S. Office of Education and NEA Research estimates (NEA Research estimates are starred):

School year	Average daily attendance	Percent increase Over 1962-63	Over previous year
1962-63	36,015,853*	...	...
1963-64	37,405,058	3.9	3.9
1964-65	38,363,303*	6.5	2.6
1965-66	39,154,497	8.7	2.1
1966-67	39,899,437*	10.8	1.9
1967-68	40,827,965	13.4	2.3
1968-69	41,396,197*	14.9	1.4
1969-70	41,934,376	16.4	1.3
1970-71	42,434,720*	17.8	1.2
1971-72	42,412,669*	17.8	-0.1
1972-73	42,277,382*	17.4	-0.3

Average daily attendance was 88.8 percent of the total cumulative enrollment in 1971-72 (Table 3, column 8). It is estimated that in 1972-73 average daily attendance will be 88.6 percent of enrollment (Table 4, column 8). Below are the figures for 1962-63 through 1972-73 (NEA Research estimates starred):

School year	Percent ADA is of cumulative enrollment
1962-63	89.2*
1963-64	91.2
1964-65	89.5*
1965-66	91.4
1966-67	89.5*
1967-68	91.3
1968-69	89.0*
1969-70	88.9
1970-71	88.7*
1971-72	88.8*
1972-73	88.6*

Column 9 of Tables 3 and 4 shows that average daily attendance is 93.5 percent of average daily membership for 1971-72 and 1972-73. for the 50 states and the District of Columbia. The difference between 100 percent and the percents shown in this column is an indication of average daily absence.

High-School Graduates

An estimated 2,804,038 high-school pupils will graduate in 1972-73. This is an increase of 2.4 percent over the estimated number of graduates in 1971-72 and 61.9 percent higher than in 1962-63. The figures below show the 10-year trend by combining the figures of the U. S. Office of Education and NEA Research estimates (starred):

School year	Number of high-school graduates	Percent change Over 1962-63	Over previous year
1962-63	1,732,243*	...	...
1963-64	2,008,371	15.9	15.9
1964-65	2,362,589*	36.4	17.6
1965-66	2,326,811	34.3	−1.5

INSTRUCTIONAL STAFF

The instructional staff comprises classroom teachers, principals, supervisors, librarians, guidance and psychological personnel, and related instructional workers. In these estimates the series on the total instructional staff is more reliable than the series on the staff components because of the differences among states in the classifications of positions within the instructional staff and shifts in these classifications over the years.

Total Instructional Staff

The total instructional staff in 1972-73 is estimated at 2,350,233. This is an increase of 0.8 percent over the revised estimate of 2,332,432 staff members in 1971-72. NEA Research estimates of the numbers of classroom teachers, principals, supervisors, and other instructional staff are shown below for the two years.

Instructional staff	1971-72	1972-73
Elementary-school classroom teachers	1,123,879	1,122,103
Secondary-school classroom teachers	962,322	978,199
Total classroom teachers	2,086,201	2,100,302
Other instructional staff	118,186	120,655
Principals and supervisors	128,045	129,276
Total staff	2,332,432	2,350,233

Since 1962-63 the instructional staff has increased 42.3 percent, an average rate of 3.6 percent a year. The trend in the total instructional staff since 1962-63 is shown below as a combination of the figures of the U. S. Office of Education and NEA Research estimates (starred):

School year	Instructional staff	Percent gain Over 1962-63	Over previous year

Classroom Teachers

Trends in the numbers of elementary- and secondary-school classroom teachers since 1962-63 are shown below in a combination of U. S. Office of Education figures and NEA Research estimates (starred):

School year	Elementary-school classroom teachers	Secondary-school classroom teachers	Total classroom teachers

1972-73	1,122,103*	978,199*	2,100,302*

The elementary-school classroom teachers totaled 1,122,103 in 1972-73, a loss of 0.2 percent over the revised estimate of 1,123,879 for 1971-72. The elementary-school classroom teaching staff has increased 25.6 percent since 1962-63.

By 1972-73 the secondary-school classroom teachers numbered an estimated 978,199, a gain of 1.7 percent over the revised estimate of 962,322 for 1971-72. Over the years since 1962-63 the number of secondary-school teachers has increased 58.0 percent.

For 1972-73 the total number of classroom teachers is estimated at 2,100,302, a gain of 0.7 percent over the revised estimate of 2,086,201 for 1971-72. Since 1962-63 the total classroom teaching staff has increased 38.8 percent.

The figures below show the percents of change in the number of classroom teachers since 1962-63 and changes year by year.

Instructional Staff Salaries

The estimate of the average salary of the instructional staff in 1972-73 is $10,643 (Table 8). The revised estimate for 1971-72 is $10,213 (Table 7). The gain of $430 represents an increase of 4.2 percent.

These average salary figures are for the entire instructional staff—classroom teachers, principals, supervisors, and other instructional personnel. In the computation of the national average, each state average is weighted by the number of instructional staff members in the state.

The trend in average salaries is shown below as a combination of figures of the U. S. Office of Education and estimates of NEA Research (starred):

School year	Average annual salary	Percent of increase Over 1962-63	Over previous year
1962-63	$5,921*	...	...
1963-64	6,240	5.4	5.4
1964-65	6,465*	9.2	3.6
1965-66	6,935	17.1	7.3
1966-67	7,129*	20.4	2.8
1967-68	7,630	28.9	7.0
1968-69	8,272*	39.7	8.4
1969-70	9,047*	52.8	9.4
1970-71	9,698*	63.8	7.2
1971-72	10,213*	72.5	5.3
1972-73	10,643*	79.8	4.2

Gains in instructional staff salaries have slowed in recent years; the 1972-73 gain of 4.2 percent was less than half the gain of 1969-70. The average salary per member of the instructional staff in 1972-73 is estimated at $10,643 an increase of $4,722, or 79.8 percent, over the average salary $5,921 in 1962-63. In terms of purchasing power, as measured by the Consumer Price Index of the U. S. Department of Labor, (1967 = 100.0), the average salary of instructional staff members had advanced from $6,478 in 1962-63 to $8,433 in 1972-73. (The C. P. I. for the 1962-63 school year equaled 91.4 and stood at 126.2 for September 1972.) Insofar as the Consumer Price Index is an accurate measure of the increases in the cost of living for instructional staff members throughout the United States, the real gain in the purchasing power of average salaries amounted to 30.2 percent in the 10 years since 1962-63.

Classroom Teachers' Salaries

For 1971-72 the estimated average salary of classroom teachers was revised to $9,705, or 95.0 percent of the average salary of the total instructional staff. The revised average annual salary of elementary-school teachers in 1971-72 was $9,424, and of secondary-school teachers, $10,031.

For 1972-73 the average salary of classroom teachers is estimated at $10,114, or 95.0 percent of the figure for the entire instructional staff, a gain of 4.2 percent over 1971-72. The estimated average salary of elementary-school teachers is $9,823; and of secondary-school teachers, $10,460.

The average salaries of elementary-school teachers are lower than those of secondary-school teachers; however, over the past years the difference has decreased. In 1962-63 the average annual salary of elementary-school teachers was 93.0 percent of the corresponding figure for secondary-school teachers. By 1972-73 the average salary of elementary-school teachers increased to 93.9 percent of the salary estimated for secondary-school teachers. The decrease in the difference may be the result of several factors: increased preparation of elementary-school teachers, longer periods of service, and improved status of the position of elementary-school teachers.

Table 7, columns 6 through 13, and Table 8, columns 8 through 15, show by state the percent distribution of classroom teachers by salaries paid. The trend for the United States is shown below:

School year	Percent of classroom teachers paid: Below $7,500	$7,500-8,499	$8,500-9,499	$9,500-10,499	$10,500-11,499	$11,500-12,499	$12,500-13,499	$13,500 and over

1972-73	16.4	16.6	17.0	13.3	10.4	9.0	6.8	10.5

In 1962-63, about 87.9 percent of all classroom teachers were paid less than $7,500. It is estimated that in 1972-73, 16.4 percent will be paid less than $7,500. In 1962-63, about 1 classroom teacher in 10 was paid $7,500 or more; in 1972-73 more than 5 classroom teachers in 6 will be paid $7,500 or more.

The average salaries paid classroom teachers from 1962-63 to 1972-73 are shown in the figures given below for elementary- and secondary-school teachers and all classroom teachers. Estimates of classroom teacher salaries are based on data compiled by NEA Research.

Differences among the states in average salaries are great. Estimated average salaries paid to instructional staff by state in 1972-73 vary from a low of $7,145 to a high of $15,176. Salaries of instructional staff for the 50 states are distributed as follows:

Estimated average annual salary of instructional staff	Number of states	Estimated average annual salary of instructional staff	Number of states
Below $7,500	1	9,500-9,999	5
$7,500-7,999	1	10,000-10,499	2
8,000-8,499	8	10,500-10,999	5
8,500-8,999	6	11,000-11,499	7
9,000-9,499	8	11,500 and over	7

In 1972-73, the salary in the state with the highest average annual salary of instructional staff is 2.1 times that of the state with the lowest salary. In 1962-63, the ratio between the highest and the lowest average state salaries was about 2 to 1. The dollar gap has grown from $3,843 to $8,031.

REVENUE AND NONREVENUE RECEIPTS

The total revenue and nonrevenue receipts of public schools are estimated at $55,094,157,000 for 1972-73. This is an increase of 6.8 percent over the revised estimated total receipts of $51,594,845,000 for 1971-72.

All receipts which become available during the school year are reported; receipts which are used for payment of principal and interest on long-term debt and nonrevenue receipts which are used largely for capital outlay expenditures are included. The figures on expenditures, however, include capital outlay but not payments on principal. Chiefly for this reason, the total receipts will generally be in excess of the total expenditures.

Revenue Receipts

This series includes revenue receipts available for expenditures for current expenses (including non-day school programs operated by the public schools), capital outlay, and debt service for public schools. Included as revenue receipts are all appropriations from general funds of federal, state, county, and local governments, receipts from taxes levied for school purposes, income from permanent school funds and endowments, income from leases of school lands, interest on bank deposits, tuition, gifts, etc.

For 1972-73, revenue receipts are estimated at $51,855,646,000, an increase of 7.2 percent over the revised estimate of $48,359,909,000 for 1971-72. Estimates of federal revenues present special problems: It is difficult for some states to estimate the imputed value of surplus commodities distributed for school food programs. In addition, the flow of federal revenues to the schools is not as predictable as funding from state and local governments. This is especially true of the estimates for 1972-73 because when these estimates were made, the appropriation of federal revenues was not enacted. In addition many states had not made final allotments to school systems from the states' share of federal revenue sharing.

From 1962-63 through 1972-73, school revenue receipts increased 176.3 percent at an average annual rate of 10.8 percent for the decade. Below are shown the revenue receipts since 1962-63 as reported by the U. S. Office of Education and NEA Research estimates (NEA Research estimates are starred):

School year	Amount (in thousands)	Percent increase Over 1962-63	Over previous year

State-by-state figures on the sources of school revenue are given in Tables 9 and 10, columns 2-4 and 6-8, for the years 1971-72 and 1972-73, respectively. These figures show an expected $134,495,000 increase in federal revenues, an expected increase of $1,856,257,000 in state revenues, and an expected increase of $1,504,985,000 in local revenues, for a total increase of $3.5 billion in revenue receipts for the year.

The following figures show the percents of revenue receipts from federal, state, and local sources for the years 1962-63 through 1972-73 as reported by the U.S. Office of Education and NEA Research. The share

from federal revenue sources was fairly constant through 1964-65. In 1965-66, new and expanded federal programs doubled the federal revenues. NEA Research estimates are starred in the series shown below:

School year	Percent of school revenue derived from: Federal sources	State sources	Local and other sources

Nonrevenue Receipts

Nonrevenue receipts include all monies received from loans, sales of bonds, sales of property purchased from capital funds, and insurance adjustments. The nonrevenue receipts for 1972-73 were estimated at $3,238,511,000, up 0.1 percent from the revised estimate of $3,234,936,000 for 1971-72. From 1962-63 to 1972-73, nonrevenue receipts increased 10.5 percent. Total nonrevenue receipts are shown in a combination of figures from the U. S. Office of Education and the NEA Research Division estimates, which are starred:

EXPENDITURES

The total expenditures of the public schools, including current expense, capital outlay, and interest, increased from $48,907,413,000 in 1971-72 to an estimated $51,762,628,000 in 1972-73. The increase of $2.9 billion includes expected expenditures from federal appropriations, rising state appropriations, and increasing local tax revenues. Increased expenditures are estimated for all major categories of expenditure, i.e., current expenditures for elementary and secondary day schools, current expenditures for other programs (community services, community colleges, adult education, etc., when operated by local school districts), capital outlay, and interest on school debt. Repayment of principal on bonded indebtedness is not included.

Total Expenditures

The total amount to be spent during 1972-73 for current expenses, capital outlay, and interest on school debt represents a 5.8 percent increase over comparable expenditures estimated for 1971-72 and a 162.3 percent increase over 1962-63.

The total expenditures from 1962-63 to 1972-73, as reported by the U. S. Office of Education and by NEA Research are as follows (NEA Research estimates are starred):

School year	Amount (in thousands)	Percent increase Over 1962-63	Over previous year

Current Expenditures

Current expenditures of elementary and secondary day schools include amounts paid for general control, instructional service, operation, maintenance, fixed charges, and other school services at all levels of administration—state, intermediate, and basic local. Current expenditure comprises all governmental contributions to the retirement fund and expenditure for school services, including attendance, health services, transportation, the net cost of food services, and other. This figure does not include payments for capital outlay and interest on school debt or, except when otherwise noted, amounts spent for community colleges, adult education, summer school, community services, and services to nonpublic-school pupils.

The estimated current expenditure increased from $41,135,936,000 in 1971-72 to $43,700,176,000 in 1972-73. The following figures show the increases in current expenditure as reported by the U. S. Office of Education and NEA Research (NEA Research estimates are starred):

1972-73	43,700,176*	180.0	6.2

Annual increases over the past 10 years have averaged 10.9 percent. In the 10 years since 1962-63, current expenditures for public elementary and secondary day schools have increased 180.0 percent.

Current Expenditure per Pupil in ADA

The current expenditure per pupil in average daily attendance (ADA) for elementary and secondary day schools for 1972-73 is estimated at $1,034, an increase of $64 over the revised figure of $970 for 1971-72.

The following figures show the average cost per pupil in ADA for each year since 1962-63 and the percent increases in cost per pupil in ADA (NEA Research estimates are starred):

School year	Amount	Percent increase Over 1962-63	Percent increase Over previous year

Current expenditure per pupil in ADA increased from $433 in 1962-63 to an estimated $1,034 in 1972-73, a rise of 138.8 percent. Variations among the states in expenditures per pupil are great. Estimated expenditure per pupil in ADA for 1972-73 varies from a low of $590 to a high of $1,584. Expenditures per pupil in ADA in the 50 states and the District of Columbia are distributed as follows:

Current expenditure per pupil in ADA for elementary and secondary day schools	Number of states	Current expenditure per pupil in ADA for elementary and secondary day schools	Number of states

Current Expenditure per Pupil in ADM

Average daily membership (ADM) is recommended as a better measure than ADA for use in computing per-pupil expenditure. It represents an average of the pupils belonging—those attending (ADA) plus those absent—and provides a measure of the actual number of pupils for whom the expenditures were made. Because some states have not adopted this method of pupil reporting, figures on expenditures per pupil in ADM are incomplete.

Column 4 of Tables 11 and 12 gives the expenditure per pupil in ADM for 1971-72 (revised) and for 1972-73 for each of the states and the District of Columbia reporting average daily membership. From this incomplete return, NEA Research has estimated that for the 50 states and the District of Columbia the expenditure per pupil in ADM is $906 for 1971-72 and $966 for 1972-73, or about 93 percent of the expenditure per pupil in ADA for each of these years.

The following figures show the average cost per pupil in ADM starting with 1962-63. The percent increases in cost per pupil in ADM are also shown (NEA Research estimates are starred):

School year	Amount	Percent increase Over 1962-63	Over previous year

Current Expenditures for Other Programs

Current expenditures for programs other than elementary and secondary day school programs include expenditures for summer schools, community colleges, adult education, and for community services (public libraries, community centers, recreational programs, etc.) when operated by local school districts.

Current expenditures for other programs amounted to $1,722,428,000 in 1971-72 and to $1,796,885,000 in 1972-73, an increase of 4.3 percent. This increase reflects the addition of community college programs in some states, increased funds for vocational and adult education, etc.

Capital Outlay

Capital outlay was estimated at $4,547,298,000 for 1971-72 and at $4,686,045,000 for 1972-73. The trend is given below by combining USOE figures and NEA Research estimates (starred):

School year	Capital outlay (in thousands)	Percent change Over 1962-63	Over previous year

1971-72	4,547,298*	45.2	4.9
1972-73	4,686,045*	49.7	3.1

Expenditures for capital outlay show increases from 1962-63 to 1972-73 at an annual rate of 4.4 percent.

Interest on School Debt

For the school year 1971-72 the total expenditure for interest was estimated at $1,501,751,000. For the school year 1972-73 this expenditure increased to $1,579,522,000, a gain of 5.2 percent. The trend from 1962-63 to 1972-73 is shown below by combining figures from the U.S. Office of Education and NEA Research (NEA Research estimates are starred):

NOTES ON ALL TABLES

HAWAII: All data, with the exception of Table 1, are NEA estimates.
NEW JERSEY: Data were supplied by the New Jersey Education Association.

TABLE 1 NOTES

CALIFORNIA: Includes 68 community college districts.
PENNSYLVANIA: Districts uniting for the operation of vocational-technical programs or special educa programs are counted both individually and collectively as administrative units.

TABLES 2 NOTES

With some exceptions, enrollment data are based on organizational level, i.e., kindergarten and ele tary as elementary, and junior and senior high school as secondary.
DISTRICT OF COLUMBIA: Enrollments for Capitol Page and Americanization Schools are not includ columns 5 and 8.
INDIANA: Column 3 includes 622 nursery school enrollees.
NEW MEXICO: Column 3 includes 6,802 kindergarten pupils in 1971-72, and an estimated 7,17 column 8 for 1972-73.
NEW YORK: Columns 3 and 8 comprise only grades K-6.

TABLES 3 and 4 NOTES

CUMULATIVE ENROLLMENT represents the total number of original entries in public schools w each state. Pupils enrolled in two or more states during the school year are counted more than therefore, the total for the United States is inflated by this duplication.
CALIFORNIA: Column 10 includes 20,000 evening school graduates.
DISTRICT OF COLUMBIA: Estimates in column 7 are based on an average of the last two years ADA computed.
NEW MEXICO: Column 10, Table 3, includes 180 graduates receiving diplomas during summer ses 1972.
OKLAHOMA: Kindergarten membership and attendance are reported as actual rather than half-time e alents in columns 5 and 7, Tables 3 and 4.

TABLES 5 and 6 NOTES

DISTRICT OF COLUMBIA: Column 4, Table 5, and column 9, Table 6, include reading and mathematics specialists.

IDAHO: Other nonsupervisory instructional staff was included in number of classroom teachers on both levels in Table 5.

MISSOURI: Junior high-school teachers were included in elementary total prior to 1971-72.

NEW HAMPSHIRE: Nonsupervisory personnel were reclassified.

NEW MEXICO: Column 2, Table 5, includes one kindergarten teacher, and column 3, Table 5, includes 241 kindergarten teachers.

OHIO: Column 8, Tables 5 and 6, includes guidance counselors and speech therapists.

TABLES 7 and 8 NOTES

NEW MEXICO: Column 2, Table 7, includes personnel paid from federal funds.

NEW YORK: The median salaries were reported in Tables 7 and 8. The mean salaries are as follows:

	1971-72 (revised)	1972-73
Average salary of instructional staff	$13,000	$14,300
Average salary of classroom teachers		
Elementary school	11,700	12,800

PURCHASING POWER estimated in 1967 dollars based on Consumer Price Index of 126.2, U. S. Bureau of Labor Statistics, September 1972 (column 4, Table 8).

TABLES 9 and 10 NOTES

FEDERAL revenue receipts include federal grant programs to state and local school systems, including the Elementary and Secondary Education Act, Economic Opportunity Act, National Defense Education Act, Manpower Development and Training Act, Educational Professional Development Act, aid to federally impacted areas, vocational education, etc. Funds received from the School Lunch and Milk Program are included, but reporting on the money value of commodities received is incomplete. Funds from the states' share of federal general revenue sharing are included for 1972-73.

LOCAL AND OTHER revenue receipts include funds from local and intermediate sources, gifts, and tuition and fees from patrons.

TEXAS: Column 5, Tables 9 and 10, includes $2,610,000 and $2,700,000 in county revenue receipts for 1971-72 and 1972-73, respectively.

UTAH: State Agency receipts not shown in columns 2 and 3, Table 9: State funds, $1,542,241 and federal funds, $1,026,183.

TABLES 11 and 12 NOTES

IOWA: Area vocational schools previoulsy reported in this column are now under community colleges.

UTAH: Amounts shown in Table 11 represent expenditures through district only. The State Agency amount is $2,568,424.
